

DESU DINAKARA SAI AVINASH

Vijayawada, AP | +91 9381767054 | sai990750@gmail.com | linkedin.com/in/desu-avinash39b892259 | github.com/Avinash-515
https://avinash-515.github.io/AVINASH_PORTFOLIO/

PROFILE

Computer Science Engineering student with strong fundamentals in Java, Python, and web technologies. Built and published a blockchain-based research project, Seeking a Software Engineer or Full Stack Developer role to contribute to production-level systems through efficient code, structured problem solving, and continuous learning.

EDUCATION

B.Tech in Computer Science Engineering — **SRK Institute of Technology, AP** 2026
CGPA: 8.1

Intermediate (XII) — **SR Junior College** 2022
CGPA: 8.3

SSC (X) — **Sri Gowtham High School** 2020
CGPA: 10.0

TECHNICAL SKILLS

Languages: Java, Python, C

Web & Frameworks: HTML, CSS, React, Flask, Django, REST APIs

Databases & Cloud: MySQL | AWS S3, EC2, Lambda (Serverless)

Blockchain: Ethereum, Solidity, Smart Contracts, IPFS

Tools: Git, GitHub, Postman, VS Code

Core CS: Data Structures & Algorithms

PUBLICATION

Blockchain Integrated Secure Image Steganography using IPFS and Ethereum Sepolia Testnet March 2026
IRJAEM – Vol. 04, Issue 03 | e-ISSN: 2584-2854 | Peer-Reviewed

- Proposed and implemented a system combining steganography, IPFS decentralised storage, and Ethereum smart contracts to ensure secure image communication and data integrity.

PROJECTS

Blockchain-Integrated Image Steganography System

Python · Flask · Ethereum · Solidity · IPFS

- Engineered a secure data-transmission platform hiding data inside images, storing on IPFS, and verifying integrity via Ethereum smart contracts — research published in peer-reviewed journal.
- Designed Flask REST API backend with async cryptographic workflows; clean separation between frontend, backend, and blockchain layers.

Localized Language Translation System

Python · Flask · JavaScript · REST APIs

- Built a real-time multilingual translation platform with caching to reduce redundant API calls and improve response throughput.

INTERSHIPS

AWS Cloud Virtual Internship — Amazon Web Services

- Built cloud data engineering pipelines using AWS S3, EC2, and Lambda; applied best practices for scalable, fault-tolerant serverless architecture.

Google AI / ML Virtual Internship — Google

- Implemented end-to-end ML pipelines covering data preprocessing, feature engineering, model training, and evaluation using scikit-learn and pandas.

Google Android Development Virtual Internship — Google

- Built REST API-integrated Android apps using modular architecture; debugged SDK-level issues in Agile sprint cycles.

CERTIFICATIONS

Cloud Computing – NPTEL, IIT Kharagpur

Java Full Stack Development – EduSkills

Programming Essentials in Python – Cisco

AINCAT 2026 – Certificate of Participation, Naukri Campus (All India NCAT)
